Introduction

I. INTRODUCTION

1. BACKGROUND

The National Science Foundation (NSF) funds research and education in science and engineering through grants, contracts and cooperative agreements. The Foundation accounts for approximately 20 percent of federal support to academic institutions for basic research. Grants.gov allows organizations to electronically find and apply for competitive grant opportunities from all Federal grant-making agencies, including NSF. Grants.gov encompasses over 900 grant programs offered by the 26 Federal grant-making agencies. It streamlines the process of awarding \$350+ billion annually to colleges, universities, K-12 school systems, businesses, informal science organizations, and other research organizations throughout the US. Grants.gov is one of 24 Federal cross-agency E-Government initiatives focused on improving access to government services via the Internet.

2. PURPOSE AND SCOPE

This instruction document was created to assist applicants in the preparation and submission of applications to the National Science Foundation. It is intended as the primary document for use in preparation of applications via Grants.gov. Where appropriate, relevant sections of the NSF Grant Proposal Guide (GPG) and Grants.gov User Guide have been incorporated by reference.

For the purpose of this document, the term “application” (used by Grants.gov) will replace the term “proposal” (used by NSF). However, the terms are synonymous.

3. INTENDED AUDIENCE

NSF grants applicants include scientists, engineers and educators. Graduate students are not encouraged to submit research applications, but should arrange to serve as research assistants to faculty members. Some NSF divisions accept applications for Doctoral Dissertation Research Grants when submitted by a faculty member on behalf of the graduate student. The Foundation also provides support specifically for women and minority scientists and engineers, scientists and engineers with disabilities, and faculty at predominantly undergraduate academic institutions. A full listing of eligible applicants is contained in the NSF Grant Proposal Guide.

Introduction

5. REFERENCED DOCUMENTS

5.1 NSF Grant Proposal Guide

The GPG provides guidance for the preparation of applications for submission to NSF. The GPG includes detailed application preparation instructions and information about NSF's application processing and review process. It also includes information about withdrawals, returns and declinations, the award and continued support, and grant administration highlights. Where appropriate, sections of the GPG have been incorporated by reference into this application guide.

NSF Grant Proposal Guide: http://www.nsf.gov/pubs/gpg/nsf04_23/

5.2 Grants.gov User Guide

The Grants.gov User Guide is a comprehensive reference to information about Grants.gov. Applicants can download the User Guide as a Microsoft Word document or as a PDF document.

General Instructions for Submission via Grants.gov

II. GENERAL INSTRUCTIONS FOR SUBMISSION VIA GRANTS.GOV

1. REGISTRATION PROCESS

Before using Grants.gov for the first time, each organization must register to create an institutional profile. Once registered, the applicant's organization can then apply for any government grant on the Grants.gov website, including NSF grants.

Grants.gov Registration: <http://www.grants.gov/GetStarted>

2. SOFTWARE REQUIREMENTS¹

2.1 PureEdge

In order to access, complete and submit applications, applicants need to download and install the PureEdge Viewer. For minimum system requirements and download instructions, please see the Grants.gov User Guide.

2.2 Special Instructions for Macintosh Users

If the applicant does not have a Windows operating system, the applicant can still use PureEdge by using a Windows emulation program. PureEdge has created detailed instructions for Macintosh users:

http://www.grants.gov/GrantsGov_UST_Grantee/!SSL!/WebHelp/MacSupportforPureEdge.pdf

¹NOTE: If the applicant has problems setting up software on their machine, the applicant may not have security permissions to install new programs on their system. If that is the case, they should contact the organization's system administrator.

III. NSF-SPECIFIC INSTRUCTIONS FOR SUBMISSION VIA GRANTS.GOV

1. NSF'S IMPLEMENTATION OF GRANTS.GOV

In furtherance of the President's Management Agenda, in Fiscal Year 2006, NSF has identified specific programs that will either authorize, or require, use of Grants.gov to prepare and submit proposals to NSF. NSF will revise each of the funding opportunities identified on the list to incorporate Grants.gov submission requirements throughout the fiscal year. Once the funding opportunity has been revised and posted to Grants.gov FIND, the application package will then become available in Grants.gov APPLY. The application package will contain the appropriate Pure Edge forms, NSF specific forms, and the NSF Grants.gov Application Guide. Applicants are advised that until the funding opportunity has been revised, the NSF FastLane system must be used to prepare and submit grant applications to NSF.

Complete Listing of NSF Programs that will either authorize, or require, use of Grants.gov to prepare and submit proposals to NSF in FY 2006: <http://www.nsf.gov/bfa/dias/policy/docs/grantsgovlisting06.pdf>

In addition, NSF does **not** accept applications through Grants.gov for the following types of transactions:

- Changed/Corrected Applications
- Continuation
- Revision

2. COMPONENTS OF AN NSF APPLICATION

The documents listed in Table 1 are components of an NSF application. The documents identified as required must be submitted to NSF as part of the application. Detailed instructions for submitting both required and optional documents can be found on the page indicated in the last column of the table.

3. CONFORMANCE WITH APPLICATION PREPARATION REQUIREMENTS

It is imperative that all applications conform to these application preparation and submission instructions. All attachments to an application also must comply with NSF font, spacing and margin requirements. The guidelines established in the GPG Chapter II, Section B (http://www.nsf.gov/pubs/gpg/nsf04_23/2.jsp#IIB2) establish minimum requirements; however, readability is of utmost importance and should take precedence in selection of an appropriate font. Conformance with all preparation and submission instructions is required and will be strictly

NSF-Specific Instructions for Submission via Grants.gov

enforced unless a deviation had been approved in advance of application submission. Please note that NSF solicitations may establish additional requirements. Applications that do not comply with this requirement will not be inserted into NSF's FastLane system and therefore cannot be reviewed. See GPG Chapter IV, Section B, (http://www.nsf.gov/pubs/gpg/nsf04_23/4.jsp#IVB) for additional information.

3.1 Portable Document Format (PDF)

NSF requires that applicants submit attachments to applications to Grants.gov in Portable Document Format (PDF). Using PDF format allows applicants to preserve the formatting of their documents. In order to save a document as a PDF, the applicant will need to use PDF generator software.

3.2.1 Creating PDF Files

NSF has published the following webpage that provides guidance on creating PDF files acceptable for submission to FastLane. **This same guidance must be followed for all attachments submitted with the NSF application through Grants.gov.**

Creating PDF Files: https://www.fastlane.nsf.gov/documents/pdf_create/pdfcreate_05a.jsp

Adobe Reader cannot produce PDF files. The applicant must use the Adobe Distiller component of Adobe Acrobat.

NOTE: DO NOT USE PDFWriter! To avoid problems with converting files to PDF, download the FastLane Job Options file as described below.

3.2.1.1 Instructions For Non-Adobe Acrobat Users

Users without Adobe Acrobat may use the PDF Conversion Utility found within FastLane to convert non-PDF documents to PDF format. The utility can be accessed by **registered** FastLane users through either the Proposal Preparation or the Research Administration modules.

Accessing the FastLane PDF Conversion Utility through Proposal Preparation

1. Navigate to the NSF FastLane homepage: <https://www.fastlane.nsf.gov/fastlane.jsp>
2. Select the Proposals, Awards and Status module.
3. Log in using your appropriate FastLane log-in information.
4. On the Quick Links menu at the left of the screen, select Convert Files to PDF.
5. Enter the location of the file in the space provided, or select the Browse button to select the file to be converted to PDF format.
6. Select the Convert to PDF button. The PDF conversion process may take a few minutes depending on your file. Upon completion of PDF conversion, the screen will indicate that your file has been successfully converted.
7. Select View PDF. The converted document appears in PDF format in Adobe Reader within your web browser.
8. Select the diskette icon to name and save your new PDF file locally to your hard drive.

2. Select the Research Administration module.
3. Log in using your appropriate FastLane log-in information.
4. On the Quick Links menu at the left of the screen, select Convert Files to PDF.

7. Select View PDF. The converted document appears in PDF format in Adobe Reader within your web browser.
8. Select the diskette icon to name and save your new PDF file locally to your hard drive.

3.2.2 Warnings and Rules

Failure to comply with the following warnings or adhere to NSF rules for PDF files may result in your application not being inserted into NSF's FastLane and the application missing the opportunity's deadline date!

Warnings

- DO NOT Use Adobe Acrobat PDFWriter
- DO NOT Use Blocked PDF Producers
- DO NOT Use Adobe Acrobat Encryption or Security Settings

Rules

- Always Check Results
- Always Embed All Fonts
- Always Use Type 1 or True Type Fonts
- Note the Special Rules for TeX or LaTeX

DO NOT Use Adobe Acrobat PDFWriter

PDFWriter does not produce acceptable PDF files, except under very limited circumstances. This can lead to NSF program officers and reviewers seeing garbled and/or incomplete versions of a file. FastLane recommends uploading one of the supported formats as identified in the Acceptable File Formats section on FastLane https://www.fastlane.nsf.gov/documents/pdf_create/pdfcreate_04.jsp?page=0 To create and upload a PDF file, use Adobe Distiller (in the same package as PDFWriter) or Ghostscript.

4. SUBMISSION OF SAME APPLICATION TO MULTIPLE AGENCIES

With the exception of the Biological Sciences Directorate policy specified below, concurrent submission of an application to other organizations for simultaneous consideration will not prejudice its review.

4.1 NSF Biological Sciences Directorate Policy

Research applications to the Biological Sciences Directorate, however, (not applications for conferences or workshops) cannot be duplicates of applications to any other Federal agency for simultaneous consideration. The only exceptions to this rule are – (1) when the applicants and program officers at relevant Federal agencies have previously agreed to joint review and possible joint funding of the application; or (2) applications for Principal Investigators (PIs) who are beginning investigators (individuals who have not been a PI) or co-principal

investigator (co-PI) on a Federally funded award with the exception of doctoral dissertation, postdoctoral fellowship or research planning grants. For applicants who qualify under this latter exception, the box for "Beginning Investigator" must be checked on the NSF Grant Application Cover Page.

5. SUBMISSION FOR REVIEW BY MULTIPLE PROGRAMS WITHIN NSF

An application needs to be submitted only once to NSF, even if the applicant envisions review by multiple programs. The submission of duplicate or substantially similar applications concurrently for review by more than one program without prior NSF approval may result in the return of the redundant applications. (See GPG Chapter IV, Section B (http://www.nsf.gov/pubs/gpg/nsf04_23/2.jsp#IIB2) for further information)

6. APPLICATIONS ELIGIBLE FOR SUBMISSION

In furtherance of the President's Management Agenda, in Fiscal Year 2006, NSF has identified specific programs that will either authorize, or require, use of Grants.gov to prepare and submit proposals to NSF. NSF will revise each of the funding opportunities identified on the list to incorporate Grants.gov submission requirements throughout the fiscal year. Once the funding opportunity has been revised and posted to Grants.gov FIND, the application package will become available in Grants.gov APPLY. The application package will contain the appropriate Pure Edge forms, NSF specific forms, and the NSF Grants.gov Application Guide. Applicants are advised that until the funding opportunity has been revised, the NSF FastLane system must be used to prepare and submit grant applications to NSF.

7. NEXT STEPS – POST SUBMISSION TO GRANTS.GOV

Until an application has been received and validated by NSF, the Authorized Representatives (AR) may check the status of an application on Grants.gov. Grants.gov requires a user login and password.

Check Application Status: <https://apply.grants.gov/ApplicantLoginGetID>

7.1 Grants.gov Contact Center

If the Authorized Representative (AR) has not received a confirmation message from Grants.gov within 48 hours of submission of the application, please contact:

7.3 NSF FastLane System

FastLane is the NSF online website through which NSF interacts with researchers and potential researchers, reviewers, and research administrators and their organizations.

FastLane: <https://www.fastlane.nsf.gov>

² Please note that the identified PI also will receive a confirmation message from NSF.

NSF-Specific Instructions for Submission via Grants.gov

For applications submitted through Grants.gov, FastLane will be utilized by the applicant to:

- Check the status of an application after it has been received and validated by NSF. See Section 7.3.1, Check the Status of an Application in FastLane below for more information;
- Add or correct information in the application after submission via Grants.gov and a notification is received from NSF that the application has been inserted into FastLane. See section 7.3.2, Proposal File Update – Post Submission and section 7.4, Warning Messages below for more information.

7.3.1 Check the Status of an Application in FastLane

After applicants receive a receipt notification from NSF, FastLane should be used to check the status of an application.

FastLane Proposal Status: <https://www.fastlane.nsf.gov/jsp/homepage/proposals.jsp>

7.3.2 Proposal File Update – Post Submission

Applications submitted through Grants.gov are considered official submissions to the Federal government.

Applicants that wish to change or correct a previously submitted application must use the Proposal File Update³ module available in the NSF FastLane System.

FastLane Proposal File Update: <https://www.fastlane.nsf.gov/jsp/homepage/proposals.jsp>

A request for a file update automatically will be accepted if submitted **prior to**:

- the deadline date specified in a program solicitation;
- initiation of external peer review in cases when a target date is utilized; and
- initiation of external peer review in the case of an unsolicited application.

A request for a file update **after** the timeframes specified above will require acceptance by the cognizant NSF Program Officer. Such requests may be submitted only to correct a technical problem with the application (i.e., formatting or print problems). Changes in the content of the application should not be requested **after** the timeframes specified above. When a request is accepted, the proposed files or revisions to application attributes will immediately replace the existing files and become part of the official application.

PIs can access the Proposal File Update Module via the "Proposal Functions" section of FastLane. Authorized individuals in the organization's Sponsored Projects Office (or equivalent) can initiate or review requests for proposal file updates using the "Submit Proposals/Supplements/File Updates/Withdrawals" Module via the FastLane "Research Administration Functions."

NSF will consider only one request for a proposal file update per proposal at a time. It is anticipated that it will be a rare occurrence for more than one file update request to be submitted for a proposal.

³ The module in FastLane that is used to update files is Proposal File Update module. The term, Proposal is the same as an application.

Grant Application Package Instructions

To go back to the first page of the form/document, simply click on the “Previous” button. Once all the relevant fields have been completed, the applicant may click on the “Close Form” button to return to the Grant Application Package screen and the list of Mandatory and Optional Documents. When a form/document is closed the completed data is captured in the application package but the form/document is not saved. The application package must be saved from the Grant Application Package screen. More information on saving the application package is available in section 1.7, Saving the Application.

On the R&R Budget form/document, the applicant may enter up to 5 budget periods. To add a new budget period, the applicant must first complete Budget Period 1. The “Next Period” button on page 3 of the R&R Budget form/document will become active once Budget Period 1 is completed.

Many of the forms/documents in the application package require the applicant to attach files. As stated in section 3.1, Portable Document Format (PDF), NSF requires that all attachments be submitted in PDF format. All attachments must also have a unique name to identify the attachment. Attachments with duplicate names will not be processed by NSF and will require resubmission of the application package through Grants.gov.

The R&R Subaward Budget Attachment(s) Form and the R&R Additional Senior/Key Person (Expanded) Form allow the applicant to attach additional PureEdge forms. Chapter V, Sections 3.17 and 5.7 provide detailed instructions for the navigation of both forms.

1.6 Accessing Help Tips

The applicant may access help tips while completing the application package by clicking on the help mode button located in the menu bar at the top of the screen. This button is shown below and is represented by an arrow and a question mark.

A question mark will appear next to the applicant’s browser cursor once the help mode button has been clicked. The applicant may use their cursor to scroll over each field on the form/document to reveal help text for each field. Click on the help mode button again to return the cursor to normal.

1.7 Saving the Application

The Save button only appears on the Grant Application Package screen. It is recommended that after the applicant completes each form/document that they click on the “Close Form” button to close the form and then save the application package by clicking on the “Save” button at the top of the Grant Application Package Screen. It is important to note that the application package will be saved to the last active directory on the applicant’s

Grant Application Package Instructions

computer. Therefore, the applicant should save the application package to their hard drive where it can easily be located. The applicant may save their application package at any time and should save the application package with the same file name each time. An error message will occur each time that the applicant saves the form before completing all of the mandatory fields on the mandatory forms or the optional forms moved to the Optional Completed Documents for Submission column on the application package.

The applicant may ignore this warning. This warning will not appear once all of the mandatory fields have been completed on all of the forms/documents in the application package.

1.8 Check Package for Errors

To initiate the Grants.gov edit check process, simply click on the “Check Package for Errors” button at the top of the screen.

This process will identify all mandatory fields that have not been completed by the applicant. These errors will be displayed one at a time.

No checks against NSF's business rules will take place at this time.

1.9 Submitting the Application

The AR must open the Internet Explorer browser, open the application and then press the Submit button. To submit the application:

1. Close all open browser(s) and running applications.
2. Open Internet Explorer.
3. From the tool bar, click **File > Open**. The **Open** window appears.

If activities involving human subjects are planned at any time during the proposed project at any performance site, check yes. Check yes, even if the proposed project is exempt from Regulations for the Protection of Human Subjects. If no, skip the rest of block 1. This field is required.

Projects involving research with human subjects must ensure that subjects are protected from research risks in conformance with the relevant federal policy known as the Common Rule (*Federal Policy for the Protection of Human Subjects*, 45 CFR 690). All projects involving human subjects must either (1) have approval from the organization's Institutional Review Board (IRB) before issuance of an NSF award or, (2) must affirm that the IRB

Research and Related (R&R) Forms and Instructions

or an appropriate knowledgeable authority previously designated by the organization (not the Principal Investigator) has declared the research exempt from IRB review in accordance with the applicable subsection, as established in section 101(b) of the Common Rule. The box for "Human Subjects" must be checked "yes" with the IRB approval date (if available) or exemption subsection from the Common Rule identified in the space provided. Check yes even if the proposed project is exempt from Regulations for the Protection of Human Subjects. If no, skip the remaining questions about Human Subjects.

The six categories of research that qualify for exemption from coverage by the regulations are defined in the Common Rule for the Protection of Human Subjects. 4.2 Are Vertebrate Animals Used? (Field 2 on the Form)

This is required information. Check yes or no.

- **Yes**
- **No**

For applications involving the use of vertebrate animals, sufficient information must be provided within the 15-page project description to enable reviewers to evaluate the choice of species, number of animals to be used, and any necessary exposure of animals to discomfort, pain, or injury. Consistent with the requirements of the Animal Welfare Act [7 U.S.C. 2131 et seq.] and the regulations promulgated by the Secretary of Agriculture [9 CFR, 1.1-4.11], NSF requires that proposed projects involving use of any vertebrate animal for research or education be approved by the submitting organization's Institutional Animal Care and Use Committee (IACUC) before an award can be made. For this approval to be accepted by NSF, the organization must have a current Institutional Animal Welfare Assurance established with the Public Health Service (PHS).

If the organization does not have such an Assurance in place, then approval of the project by the IACUC of an organization with a current PHS Assurance will be acceptable, if the IACUC agrees to provide the required oversight of facilities and activities during the award. Alternatively, the submitting organization may create its own

If the application includes such information, check yes and clearly mark each line or paragraph on the pages containing the proprietary/privileged information with a legend similar to - "The following contains proprietary/privileged information that (name of applicant) requests not be released to persons outside the Government, except for purposes of review and evaluation."

Such information also may be included as a separate statement. If this method is used, the statement must be submitted electronically as a single-copy document and attached in Block 6 of the National Science Foundation Grant Application Cover Page. While NSF will make every effort to prevent unauthorized access to such material, the Foundation is not responsible or in any way liable for the release of such material. 4.6 Attach Project Summary/Abstract (Field 6 on the Form)

The Project Summary must contain a summary of the proposed activity suitable for dissemination to the public. It should be a self-contained description of the project and should contain a statement of objectives and methods to be employed. It should be informative to other persons working in the same or related fields and insofar as possible, understandable to a scientifically or technically literate lay reader. This Summary must not include any proprietary/confidential information. To attach a Project Summary/Abstract, click "Add Attachment".

The Project Summary must not be more than one page in length and must be suitable for publication. It must clearly address in separate statements (within the one-page summary): (1) the intellectual merit of the proposed activity; and (2) the broader impacts resulting from the proposed activity. (See Chapter III, Section A of the GPG for further descriptive information on the NSF merit review criteria.) It should be informative to other persons working in the same or related fields and, insofar as possible, understandable to a scientifically or technically literate lay reader. *Applications that do not separately address both merit review criteria within the one page Project Summary will be returned without review.*

4.7 Attach Project Narrative (Field 7 on the Form)

Each reference must include the names of all authors (in the same sequence in which they appear in the publication), the article and journal title, book title, volume number, page numbers, and year of publication. Include only bibliographic citations. Proposers should be especially careful to follow scholarly practices in providing citations for source materials relied upon when preparing any section of the application. Please click the add attachment button to the right of this field to complete this entry.

If the applicant has a Website address readily available, that information also should be included in the citation. It is not NSF's intent, however, to place an undue burden on applicants to search for the URL of every referenced publication. Therefore, inclusion of a Website address is optional. An application that includes reference citation(s) that do not specify a URL address is not considered to be in violation of NSF application preparation guidelines and the application will still be reviewed.

4.9 Attach Documentation for Facilities & Other Resources (Field 9 on the Form)

This information is used to assess the capability of the organizational resources available to perform the effort proposed. Identify the facilities to be used (Laboratory, Animal, Computer, Office, Clinical and Other). If appropriate, indicate their capacities, pertinent capabilities, relative proximity, and extent of availability to the project. Describe only those resources that are directly applicable to the proposed work. Provide any information describing the Other Resources available to the project (e.g., machine shop, electronic shop) and the extent to which they would be available to the project. To attach a document for Facilities and Other Resources, click "Add Attachment".

4.10 Attach Equipment Documentation (Field 10 on the Form)

The categories of information identified in GPG Chapter II, Section C.2.j, are not considered part of the 15-page project description limitation. This Special Information and Supplementary Documentation section also is not considered an appendix. Specific guidance on the need for additional documentation may be obtained from the organization's sponsored projects office or in the references cited in GPG Chapter II, Section C.2.j.

Applications submitted to NSF may identify a **maximum of four co-Principal Investigators**. In cases where applications are submitted that include more than 4 co-PIs, NSF only will use the first 4 names entered on this form. Any person identified as a co-PI in addition to the first 4 co-PIs listed will have their role changed to “Senior Key Person” in NSF’s FastLane system. Since Grants.gov can not control the order the Additional Senior/Key Person Form Attachments are sent to the agencies, the co-PIs should not be identified on an Additional Senior/Key Person Form Attachment but entered as one of the first 8 senior/key persons.

5.8 Attach Additional Senior Key Person Profiles

If more than 40 senior/key person profiles are proposed, provide the information requested in a separate file and attach here.

will not be inserted into FastLane and therefore will not be reviewed. This section should also include such roles as Co-PD/PI/PD, Postdoctoral Associates, and Other Professionals.

As a general policy, NSF recognizes that salaries of faculty members and other personnel associated directly with the project constitute appropriate direct costs and may be requested in proportion to the effort devoted to the project. NSF regards research as one of the normal functions of faculty members at institutions of higher education. Compensation for time normally spent on research within the term of appointment is deemed to be included within the faculty member's regular organizational salary. Grant funds may not be used to augment the total salary or rate of salary of faculty members during the period covered by the term of faculty appointment or to reimburse faculty members for consulting or other time in addition to a regular full-time organizational salary covering the same general period of employment. Exceptions may be considered under certain NSF science and engineering education program solicitations for weekend and evening classes or for administrative work done as overload. (See [GPM Section 611](#))

Summer salary for faculty members on academic-year appointments is limited to no more than two-ninths of their regular academic-year salary. This limit includes summer salary received from all NSF-funded grants. These same principles apply to other types of non-academic organizations, such as research institutes. Since their employment periods are usually annual, salary must be shown under "calendar months." For such persons, "summer salary" is normally inappropriate under an NSF grant.

The Appropriation Act applicable to NSF for Fiscal Year (FY) 2006 does not contain a limitation on payments to consultants under NSF awards and therefore, this constraint has been eliminated for FY 2006 appropriated funds. Requested compensation for consultant services, however, should be comparable to the normal or customary fees charged and received by the consultant for comparable services, especially on non-governmental contracts and grants. Use the budget justification to further itemize and justify.

3.1 Enter Deviation Authorization (If Applicable)

It is important that all applications conform to the instructions provided in this Guide, and where applicable, the Grant Proposal Guide (GPG). Conformance is required and will be strictly enforced unless a deviation has been approved. NSF may return without review applications that are not consistent with these instructions. See Chapter IV, Section B of the GPG, for additional information. NSF must authorize any deviations from these instructions in advance. Deviations may be authorized in one of two ways:

1. Through specification of different requirements in an NSF solicitation; or
2. By the written approval of the cognizant NSF Assistant Director/Office Head or designee. These deviations may be in the form of a "blanket deviation" for a particular program or programs or, in rare instances, an "individual" deviation for a particular application.

Applicants may deviate from these instructions only to the extent authorized. Applications must identify the deviation in one of the following ways as appropriate - (a) by identifying the solicitation number that authorized the deviation in the appropriate block on the application Cover Sheet; or, (b) for individual deviations, by identifying the name, date and title of the NSF official authorizing the deviation. Further instructions are available on the FastLane Website (<https://www.fastlane.nsf.gov/fastlane.jsp>).

Requests for approval of a deviation from NSF's electronic submission requirement must be forwarded to the cognizant NSF program for review and approval prior to submission of the paper application.
